

# Environment Week Edition

## 2025, Vol. 1 Issue. 1

TRIYOG HIGH SCHOOL, Tokha-6, Kathmandu. Tel- 4965285, 4981695, Email- info@triyog.edu.np

### A note from the Editorial Team

#### Dear Reader,

This is a snapshot of what happens when students start showing up with ideas, energy, and heart.

We had the chance to witness something special this Environment Week: clubs crossing paths, creativity taking center stage, and students stepping into roles they didn't even know they were ready for.

A photo became a movement.

A runway left a legacy.

A letter whispered something important.

A quiet classroom corner turned into a game lab.

And a week turned into an archive.

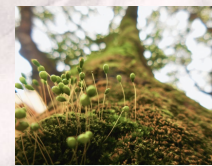

This first issue of "SPELTSS" captures that beautiful mess of ideas, effort, and intention. It's proof that we're not just students; we're builders of culture, curators of meaning, and pioneers of the future.

From chaotic assemblies to calm letter writing, from code and poetry to film edits and impromptu brainstorming, this week reminded the Learning Societies that impact doesn't have to wait; it can be created anywhere, together.

What you'll find in the pages ahead isn't just a summary; it's a record of what it looks like when curiosity meets courage. It's student voice in its rawest, realest form.

So flip through slowly. These aren't just club updates. They're the first chapters of stories still unfolding.

**Sitanshu Shrestha**, Learning Societies Coordinator

# HARIYO BAN

EKDAM URGENT MEETING

While 'Pollution' is busy putting up a mockery of the Hariyo Ban meeting, highlighting the plethora of hypocrisies of humans, we come across 'Manavs', the sole creatures that can either save or destroy. Thus begins the 10-minute timeline of hope, humor, and utter disappointment.

## GREEN QUIZ

NATURE KNOWS REWARDS

As the assembly buzzed with anticipation, the Eco Quiz challenged minds across grades with questions that tested what we really know about our planet. Each correct answer earned a sweet victory—literally. It wasn't just about prizes; it was a playful reminder that knowledge is the first step toward change.

## PLANT EXCHANGE

BRING ONE, TAKE ONE, SIMPLE.

On Environment Day, students and teachers were invited to bring a plant and swap it for another, creating a living cycle of sharing, care, and green intention. No pressure. Just roots being passed from one hand to another. Each plant carried a story, and each exchange symbolized trust: that whoever takes it will help it thrive.

## MUSICAL PERFORMANCE

SOUNDTRACKS OF SUSTAINABILITY

During the morning assembly, students gave a touching musical performance focused on the environment. They sang the song of the ocean, delivering a powerful message about protecting our planet. The performance inspired everyone to reflect on their role in caring for the Earth.

## TRASH TO TALE

ONE'S TRASH, ANOTHER'S TRESASURE

Trash wasn't just discarded; it became a canvas for stories that needed to be told. Participants transformed everyday waste into powerful short stories and monologues, each carrying a message straight from the heart to the Earth. This event fused creativity with urgent environmental truth, proving that even what we throw away can inspire reflection, hope, and a commitment to a cleaner future.

## LETTER TO FUTURE EARTH

DEAR EARTH, I'M...

'Letter to Future Earth' invited students from Grades 6 to 10 to write heartfelt messages addressed to the planet, from a future one decade or even a century ahead.

Each letter became a time capsule of hope, fear, apology, or promise — honest reflections of today and where we might be heading. Students were encouraged to think deeply about the environmental crises we face: climate change, pollution, resource exhaustion.

## STREET TRASH TALK

REAL TALK. REAL TRASH. REAL FAST.

In hallways, during breaks, outside classrooms; everywhere, students of the photo and journalism club caught them off guard and got real answers. Some spoke from frustration, others from facts. Some were hopeful, many were worried. All were honest.

It wasn't scripted. It wasn't pretty. But it was real.

## A PROMISE IN GREEN

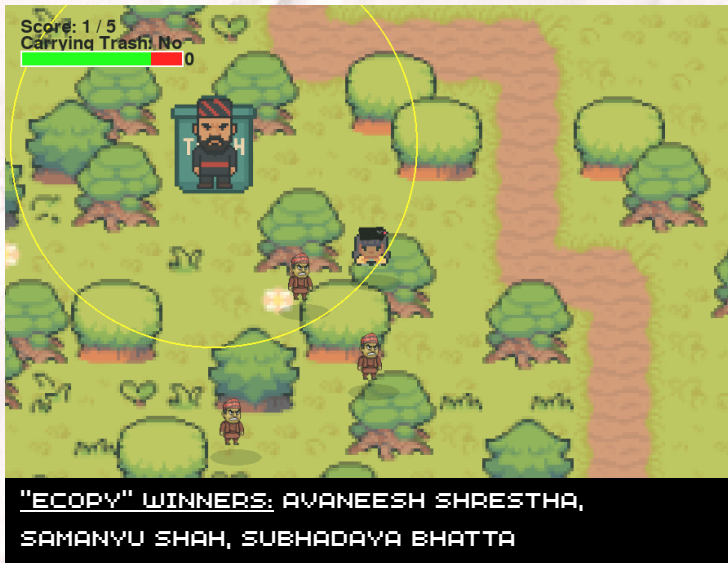

PROTECT. PRESERVE. AND RESTORE

One not tied to assignments or exams, but to the Earth itself. With hands raised and voices steady, they pledged to protect the environment in their daily lives: to reduce waste, respect natural resources, and hold themselves accountable for the impact they have on the planet. The oath was a symbolic act of unity, a reminder that change comes with everyday choices.

# CODE GREEN: PIXELS PLANT HOPE

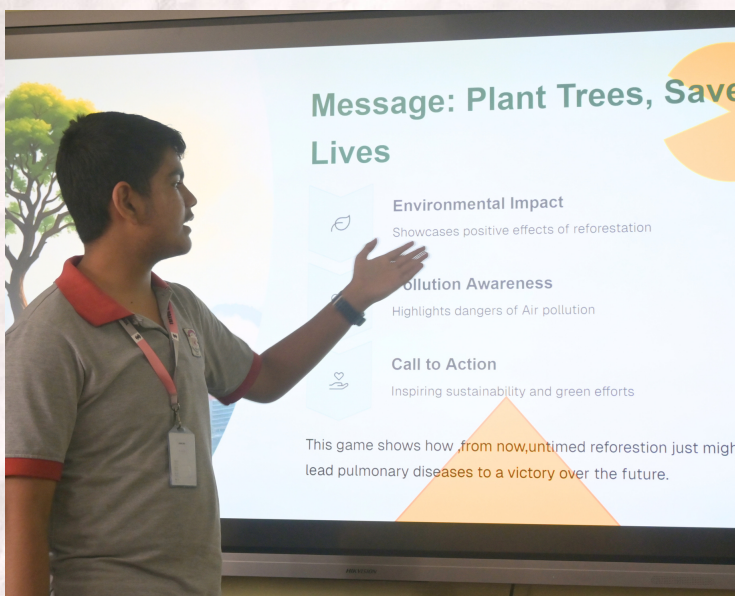

EcoPy was a 3-day, student-led game development competition where passion met purpose. Students from Grades 8 to 10 formed four dynamic teams, designing environment-themed games using Python and the Pygame library.

From concept to code, every decision, from storyline to graphics, was their own. They tackled real-world issues like pollution, conservation, and climate change through digital storytelling, transforming urgent environmental messages into interactive gameplay.

More than just a tech challenge, EcoPy was a space for peer collaboration, rapid problem-solving, and turning code into climate action. It wasn't about perfection; it was about progress, purpose, and student-powered innovation.

**"SCRATCH IT GREEN" WINNERS: SARTHAK KUNWAR, ANMOL ARYAL, NILABH NEPAL**

Scratch It Green was a week-long online initiative designed to introduce students from Grades 4 to 6 to the world of coding with the environment as their canvas. With no mentors or live sessions, students independently explored Scratch, creating their own environment-themed games. The result? A burst of self-taught innovation.

This wasn't about being taught; it was about figuring it out. With curiosity as their guide and Scratch as their playground, students explored, experimented, and built entirely on their own. In doing so, they showed that when young minds are given the tools and the trust, they don't just play games; they imagine, design, and bring it to life.

# RE-FASH

WHERE  
fashion

MEETS

*purpose*

*Runway*

Given two weeks, self-brought waste materials, a heart full of passion, and a mind of complete creativity, the audience watched as the models exemplified their designers' vision. Models wearing dresses made essentially from waste products took center stage as the runway music echoed through the unforgettable Triyog assembly. With endearing walks and meaningful collaboration, deafening applause marked the end of the Re-Fash Runway 2025. More to come? We wonder...

# FROM THE PRESIDENTS' DESK

## **SPORTS CLUB**

The Sports Club is one of the seven vibrant learning societies in our school, a true hub of energy, passion, and teamwork. It brings together students who share a deep love for sports and physical activity, creating a community where enthusiasm meets purpose and talent is nurtured through collaboration and commitment.

As president, my vision is to shape the Sports Club into a dynamic, inclusive, and empowering space. A place where every member, whether a competitive student or a curious beginner, is encouraged to grow, stay active, and embrace the true spirit of sportsmanship. This year, we are setting ambitious goals: to expand participation across all levels and provide enriching opportunities for skill development through a variety of engaging events like competitive tournaments and fun-format matches.

At the heart of everything we do will be a strong, supportive club culture. Fostering unity and collaboration is one of my top priorities. I believe that success comes from working together, and I'm committed to creating an environment where every voice is heard and every effort is valued. Through open communication, mutual respect, and shared leadership, we will build a community that thrives on inclusion and teamwork.

**Nirvik Khatri, Sports Club**

## **STEAM CLUB**

My vision for the STEAM Club is to create a vibrant school community where learning leaps beyond textbooks and transforms into curiosity-driven, hands-on exploration. I believe that when science, technology, engineering, the arts, and mathematics come together, they spark innovation, ignite critical thinking, and encourage students to ask bold questions and connect ideas in meaningful ways.

Whether it's building models, showcasing interactive exhibitions, or taking on problems, the STEAM Club is determined to leave a legacy behind.

We're committed to working closely with teachers, peers, and other student groups to create an environment where ideas flow freely and learning feels dynamic and interconnected. By sharing skills and perspectives, we strengthen our collective ability to grow not just as students but as innovators and changemakers.

The spirit of the STEAM Club is grounded in teamwork, open-mindedness, and passion. Together, we will make this year a celebration of discovery, imagination, and fearless creativity.

**Pranjal Panthi, STEAM Club**

## **PHOTO AND JOURNALISM**

The Photo and Journalism Club envisions a vibrant community where students use the power of images and words to inform and inspire. In today's media-driven world, the club encourages students to become sharp observers and thoughtful communicators of truth. Through photography, reporting, interviewing, and creative writing, members learn to document school events, daily moments, and social issues with purpose and passion.

Our mission is to nurture creativity, build technical skills, and uphold the ethics of journalism. We aim to help students think critically, ask meaningful questions, and tell impactful stories, whether it is about covering school programs, celebrating achievements, or highlighting important issues.

The club emphasizes collaboration and real-world engagement. It also serves as a platform for member mentorship and provides platforms to publish their work. Every student is encouraged to explore and develop their unique voice, whether behind the camera, conducting interviews, or crafting compelling articles.

**Arbinda Sapkota, Photography and Journalism Club**

## **LITERARY CLUB**

In a time when communication often feels rushed, the Literary Club brings focus back to the beauty of thoughtful expression. The Literary Club shall be the creative space where language serves as a powerful medium to express ideas.

Through poetry, speeches, debates, and everything in between, my club aims to nurture a love for words while developing confidence in writing and originality.

The vision of the Literary Club is to build a strong community of readers, writers, speakers, and thinkers who understand the value of language in shaping perspectives and sparking change. We aim to go beyond textbooks and explore literature as a living and breathing force that connects people, ideas, and emotions.

Literature is everywhere—in the arts, in history, in science—and so the club aims to connect with other Learning Societies to create events that blend creativity with curiosity. The club strives to cultivate a culture of thoughtful expression and literary excellence.

**Yashasvi Karki, Literary Club**

## **ECO CLUB**

The Environment Club is an active, inclusive space for students who care deeply about the planet and sustainable living. Built on the belief that change starts with awareness and action, the club envisions a world where people live in balance with nature and make thoughtful choices for the Earth's future.

Our goal is to build strong environmental values and empower students to become responsible global citizens. Through hands-on projects, awareness drives, and creative campaigns, we tackle issues like climate change, pollution, deforestation, and loss of biodiversity, while also encouraging real-world solutions and a deeper bond with nature.

The Eco Club thrives on teamwork, innovation, and a shared commitment to protecting the environment. Inspired by Chief Seattle's wisdom, "We do not inherit the Earth from our ancestors, we borrow it from our children," we are united in our mission to learn, take action, and inspire others to care for the world we all share.

**Ayumi Dhital, Environment Club**

## **TRIKALA CLUB**

Ideas collide here,  
Trikala minds in motion  
No room for fear,  
We chase every notion.

As the proud president of Trikala Club, it brings me immense pleasure to reflect on our journey till now and what's to come next. Trikala plans on doing excursions to theatres, museums, and exhibitions, to freestyle competitions where artists unleash their imagination in any form of art in a week's time. Musical jams, electrifying battle of the bands, group dance showdowns, and the colorful vibrance of art mela will be just a few of the events we have thought of that we can "share."

Said by Henry Matisse, "Creativity takes courage." We're not looking for perfection; we're looking for passion. Whether it's a small suggestion or an idea as bold as reaching for the moon, every initiative matters.

Each taal, each brush stroke, each note, and each step will be seen.

**Soyung Rai, Trikala Club**

## **SOCIAL SERVICE & HEALTH CLUB**

From my perspective, the Social Service and Health Club isn't just about organizing activities. It's about shaping who we are as people. I see it as a way for students like us to become more aware, more compassionate, and more involved in real issues that affect our communities.

What we aim to do goes far beyond the classroom. Whether it's learning how to recognize early signs of serious diseases, supporting our traffic police in the scorching heat, or caring for the elderly in ways that really matter, these actions help us grow while making a difference in the lives of others.

Our goals might seem simple, but to me they carry a lot of weight. We want to raise awareness, share practical health knowledge, and show respect and care for those who often go unnoticed. Every project we take on teaches us to be more responsible and more human.

Above all, I see the club as a space where empathy leads the way. It is about kindness, teamwork, and stepping up when it matters most. In the end, it is not just about helping others. It is about becoming better versions of ourselves together.

**Aaditya Poudel, Social Service and Health Club**

# CABINET “SEVEN”

These seven students have taken on the important role of leaders with honesty, care, and hard work. They do more than just make announcements or share information. They listen carefully to others, learn from what they hear, and help build a school culture where students take charge and make a positive difference.

Each certificate and handshake you see here means something important. It shows their dedication and commitment. It reminds us of the many long meetings they attended to plan and organize activities. It brings to mind the many discussions and debates they had while trying to find the best ideas. It also includes the last-minute problems they fixed before events started and the many hours they spent working on challenges that most people did not even notice. All these efforts show what this Cabinet truly stands for.

Meet the dream team: the President, Vice President, Secretary, Treasurer, and nine other executives. Together, they form a powerhouse crew that supports clubs, plans awesome events, and listens closely to what students really want.

With guidance from the Learning Societies and teachers, Cabinet Seven shows what student leadership looks like when it's all about clear goals and real action. The Vice President is the President's right hand, ready to jump in whenever needed. The Secretary keeps everything organized and makes sure everyone stays in the loop. The Treasurer is the money wizard, managing the budget like a pro. The other executives take charge.

This page celebrates not just their roles but the incredible people they're becoming—thoughtful, brave, and totally committed to making a positive difference that lasts.
